KLINGER, SCOTT M

ART UNIT

PAPER NUMBER

2153

DATE MAILED: 05/05/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

**Office Action Summary**

Application No.

09/865,161

Applicant(s)

O' TOOLE ET AL.

Examiner

Scott M. Klinger

Art Unit

2153

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on 05 November 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-26 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-26 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_

### DETAILED ACTION

Claims 1-26 are pending.

#### *Response to Arguments*

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies were not recited in the originally rejected claims. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Applicant's arguments with respect to claims 1-26 have been considered but are moot in view of the new ground(s) of rejection.

#### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 7, 8, 10-13, 17, 18, 20-22, and 24 are rejected under 35 U.S.C. 102(e) as being anticipated by Ueno et al. (U.S. Patent Number 6,438,596, hereinafter "Ueno").

In referring to claim 1, 11, 20, and 21,

- Receiving at the transferring node collection of data from a provider node; transferring a copy of the collection of data to a child node of the transferring node in response to the step of receiving the collection of data; storing the collection of data in a data storage in the transferring node after completing the step of transferring the copy of the collection of

Art Unit: 2153

data:

*"Furthermore, throughout this specification, video servers include a temporary memory type server, called a cache node or a network cache, in which a video is stored on or near a communication line set for transmitting the video information which is being offered to a user, and the same video is reused on another user's demand."* (Ueno, col. 1, lines 39-45)

In referring to claims 2 and 12,

- The step of receiving the collection of data comprises receiving the stream of packets in a buffer:

*"The network resources management control unit 1004 manages and controls the network resources, such as the bands of transmission lines contained in the core network 1002, and the buffer capacities of exchange nodes."* (Ueno, col. 18, lines 47-51)

The step of transferring the copy of the collection of data comprises propagating the stream of packets from the buffer to descendent nodes of the transferring node for access by a first client making a first request for the collection of data from the descendent node; Storing the collection of data comprises transferring the stream of packets from the buffer to the data storage in the transferring node in a manner enabling access to the collection of data by a second client making a second request for the collection of data: *Ueno, col. 1, lines 39-45* (see full quote above)

In referring to claims 3 and 13,

- Transferring copies of the collection of data to each of the plurality of child nodes:  
*Ueno, col. 1, lines 39-45* (see full quote above)

Art Unit: 2153

In referring to claims 7 and 17,

- The step of transferring the copy of the collection of data comprises transferring the copy of the collection of data between the provider node and the child node through the transferring node in a delayed timing mode:

*Ueno, col. 1, lines 39-45* (see full quote above); when the data is reused for another user, the data is time shifted, and therefore in a delayed timing mode

In referring to claims 8 and 18,

- The step of storing the collection of data comprises retaining the collection of data after confirming the receipt of the copy of the collection of data by the child node:

*Ueno, col. 1, lines 39-45* (see full quote above)

In referring to claim 10,

- Maintaining a connection among the network of nodes in order to transfer the collection of data:

*Ueno, col. 1, lines 39-45* (see full quote above)

In referring to claims 22 and 24,

- Allowing access to the collection of data in the data storage at the transferring node at a later time by at least one of the child node and another node:

*Ueno, col. 1, lines 39-45* (see full quote above)

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 2153

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4, 9, 14, and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ueno in view of Robles et al. (U.S. Patent Number 6,282,172, hereinafter "Robles"). Although Ueno shows substantial features of the claimed invention, Ueno does not explicitly show a step of providing an acknowledgment indicating that the collection of data is complete. Nonetheless this feature is well known in the art and would have been an obvious modification to the system disclosed by Ueno as evidenced by Robles.

In analogous art, Robles discloses generating acknowledgement signals in a data communication system. Robles shows a step of providing an acknowledgment indicating that the collection of data is complete: *"An embodiment of the invention receives a data packet from a source node for transmission across a communication medium to a destination node. The system generates an acknowledgment signal indicating receipt of the data packet at the destination node. The acknowledgment signal is generated before completing transmission of the data packet to the destination node. The system then transmits the acknowledgment signal to the source node."* (Robles, col. 2, lines 50-57)

Given these teachings, a person of ordinary skill in the art would have readily recognized the desirability and advantages of implementing the system of Ueno so as to use a step of providing an acknowledgment indicating that the collection of data is complete, such as taught by Robles, in order to verify that the task was completed.

---

Claims 5, 6, 15, and 16, are rejected under 35 U.S.C. 103(a) as being unpatentable over Ueno and in view of Acosta (U.S. Patent Number 6,496,520, hereinafter "Acosta"). Although Ueno shows substantial features of the claimed invention, Ueno does not show receiving an indication for retransmission of one or more packets. Nonetheless this feature is well known in the art and would have been an obvious modification to the system disclosed by Ueno as evidenced by Acosta.

Art Unit: 2153

In analogous art, Acosta discloses a wireless network system and method. Acosta shows receiving an indication from the child node that the copy of the collection of data received by the child node is incomplete; and transferring copies of at least one packet of data to the child node to complete the copy of the collection of data received by the child node: *"FIG. 6 is a block diagram of a retransmit request message packet 50 sent by a receiving device 52 in response to an incomplete payload 30 (shown in FIG. 4) reception, when the header packet 41 of the particular payload 30 has been received by the receiving device 52 but other data packets 40 have not been so received."* (Acosta, col. 5, lines 56-61)

Given these teachings, a person of ordinary skill in the art would have readily recognized the desirability and advantages of modifying the system of Ueno so as to provide a means for retransmission of packets, such as taught by Acosta, in order to improve communications over low bandwidth, poor quality channels.

---

Claims 23, 25, and 26, are rejected under 35 U.S.C. 103(a) as being unpatentable over Ueno and in view of Deering (RFC 1112, hereinafter "Deering"). Although Ueno shows substantial features of the claimed invention, Ueno does not explicitly show the video stream is a multicast stream. Nonetheless this feature is well known in the art and would have been an obvious implementation of the system disclosed by Ueno as evidenced by Deering.

In analogous art, Deering discloses host extensions for IP multicasting. Deering shows transmitting IP datagrams to a group of requesters using IP multicasting.

Given these teachings, a person of ordinary skill in the art would have readily recognized the desirability and advantages of implementing the system of Ueno so as use multicasting to simultaneously deliver a single stream of information to multiple users, such as taught by Deering, in order to conserve bandwidth and reduce network traffic.

---

Art Unit: 2153

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott M. Klinger whose telephone number is (571) 272-3955. The examiner can normally be reached on M-F 9:00am - 5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Burgess can be reached on (571) 272-3949. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
